

Week 10 and 11

Work Objectives of this diary

- 1.To outline the current progress of my work/research and project status
- 2.To outline changes that have been made to accommodate covid-19 restrictions

Methodology

Was able to head into uni to collect the water quality device prototype. Got to try to set it up in the lab with no success, was able to take it home, but have had no time yet to figure out how to launch the settings, will need to contact Phillip Zannon for assistance at some stage.

Outcome and Results

Worked a little more on developing the web interface

Discussion and Conclusion

Start writing the draft submission, still only at about 4000 words

Achievements and Problems

Writing a scientific report about an it project is difficult filling out a 7500 word count will be difficult.
